

## **Kaye has appointed new distributor agreement with ENA to serve the Japanese Pharmaceutical Market for the entire Kaye product portfolio**

**St.Mary's PA USA – May 2015** Amphenol Advanced Sensors' Kaye product line has appointed ENA to represent the entire Kaye Validation & Monitoring product line in Japan.

We are pleased to communicate, that starting June 2015 Kaye will have a strategic partnership with ENA to optimize our pre-and after sales support for the entire Kaye product line in Japan. The growing demand on high quality thermal validation and monitoring equipment within the Japanese pharmaceutical – and biotech market is requesting a high quality local support. With ENA we have found an experienced partner, very well established in pharmaceuticals as well as trained on Kaye equipment result of past experiences acting as a supplier for sterilization equipment in Japan. ENA engineers are trained to provide on-site trouble shooting and quick-fix services offerings like calibration of Kaye Validator2000 units as well as dry well ovens used in combination with the Kaye Validator and on-site IQ/OQ. Local and native speaking support during installation will help unexperienced users; additional hands-on trainings will further optimize the usage of current equipment and help existing customers to fully leverage all capabilities of our fully automated Kaye Validator2000 Thermal Validation system.

We are looking forward supporting our Kaye customers with the local support of the experienced ENA engineering team.

### **About Amphenol Advanced Sensors:**

Amphenol Advanced Sensors is a leading innovator in advanced sensing technologies and innovative embedded measurement solutions customized for regulatory and industry driven applications, creating value by providing critical information for real time data decisions.

Amphenol Advanced Sensors is a company of leading industry brands as Telaire, **Kaye**; Thermometrics, Modus Instruments, NovaSensors, and Protimeter are industry leaders over 70 years.

Amphenol Advanced Sensors offers industry leading domain expertise, rapid customization, world-class manufacturing capability and lasting customer relationships to deliver the greatest value in cost of ownership to their customers
